

Dr. Wälti AG
Institut für angewandte
Mathematik, Statistik, Informatik

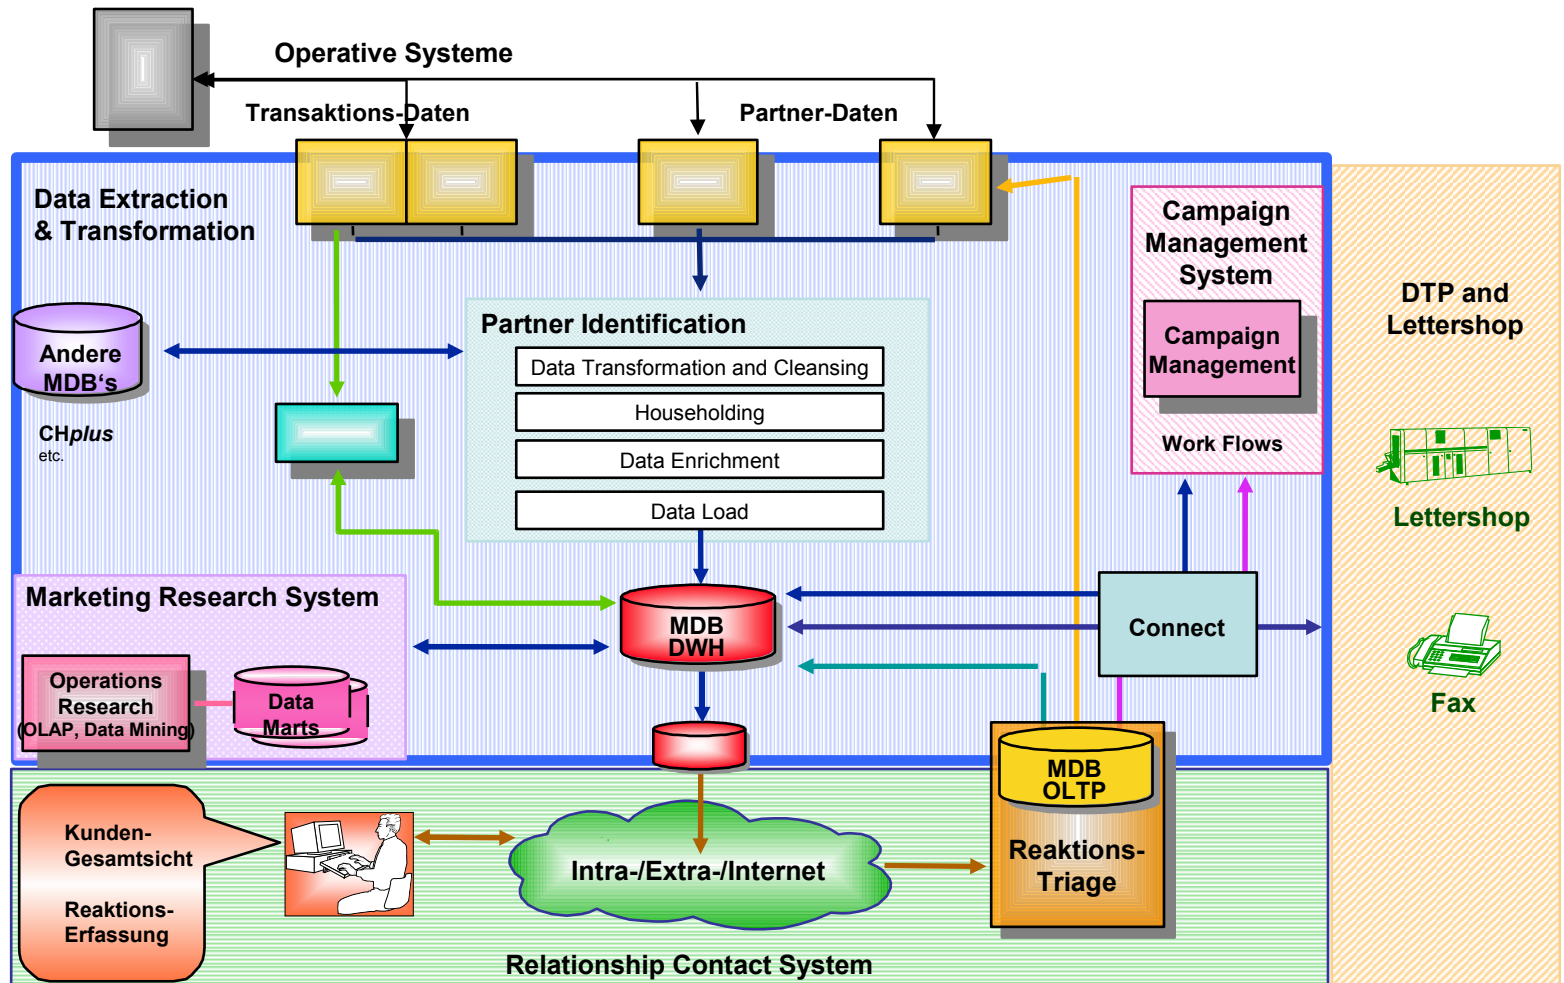

Location: Buchs SG

Foundation: 1981

Daughter Firm: InfoCodex SA

Marketing-Datenbank der Winterthur Versicherungen

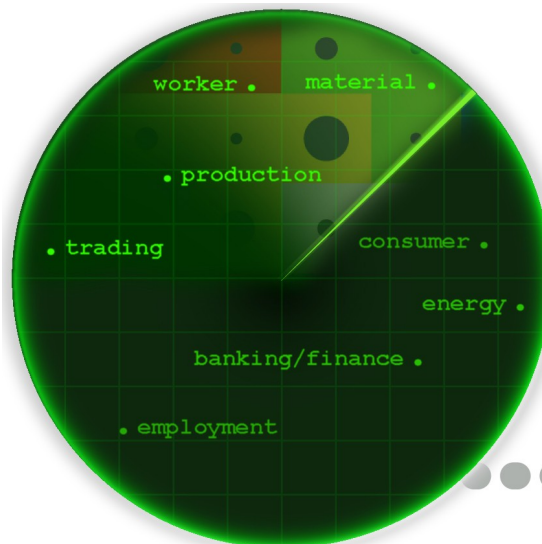

Applications / Benefit

1. Information Research

- Attain an overview
- Enhancement to internet search engines
- Thematic radar

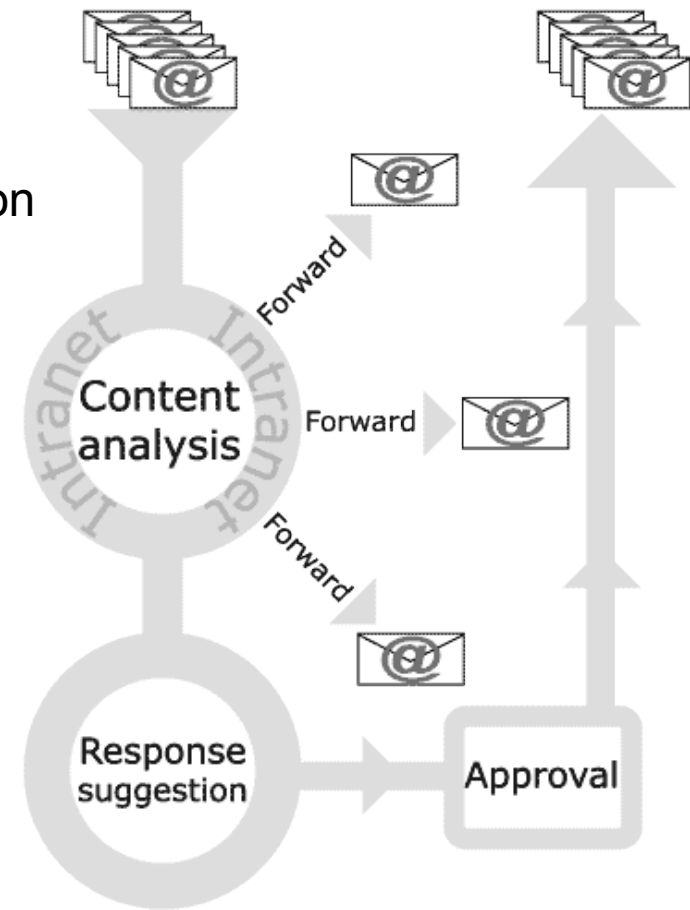

2. Exploit Company Internal Knowledge

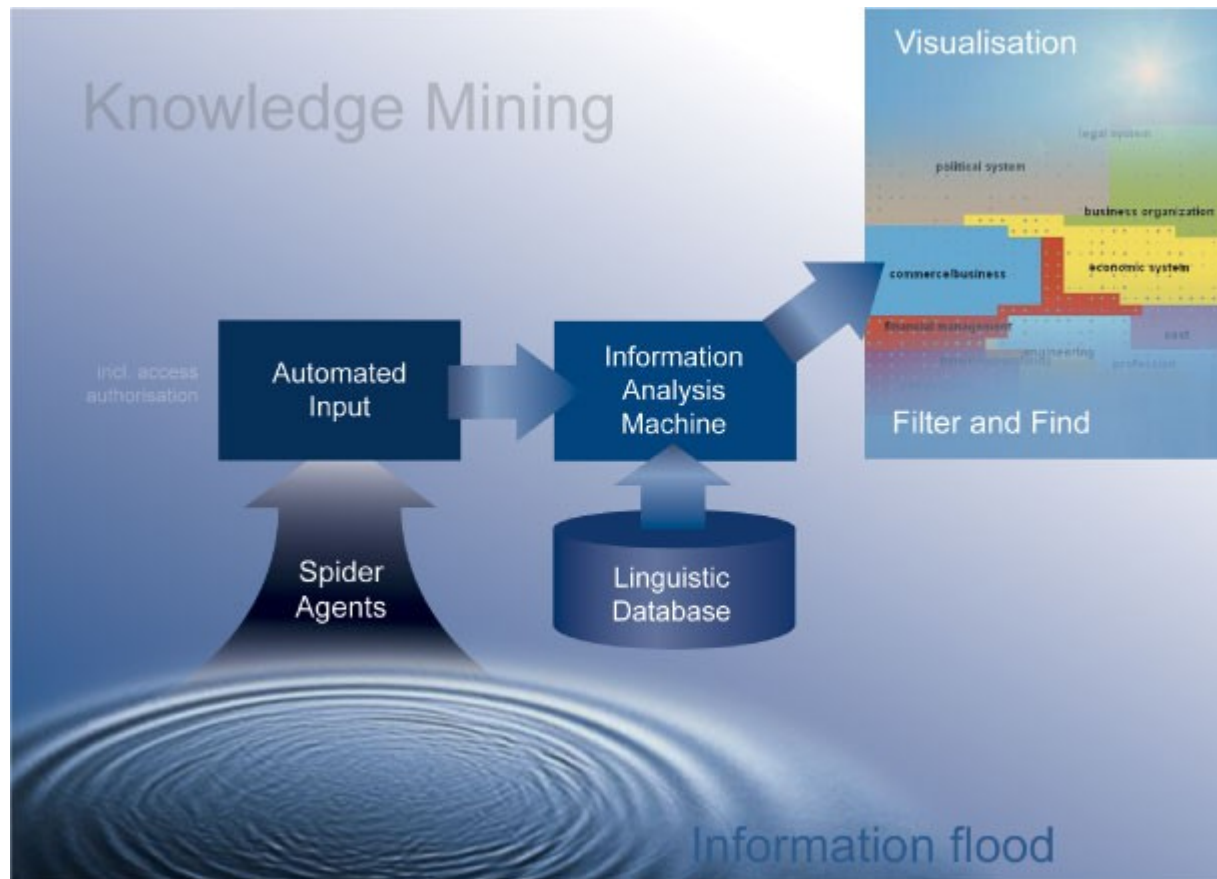

- What is where
(automatic shelving of documents into well organized categories)
- Coordination of knowledge resources
- Company internal search engine

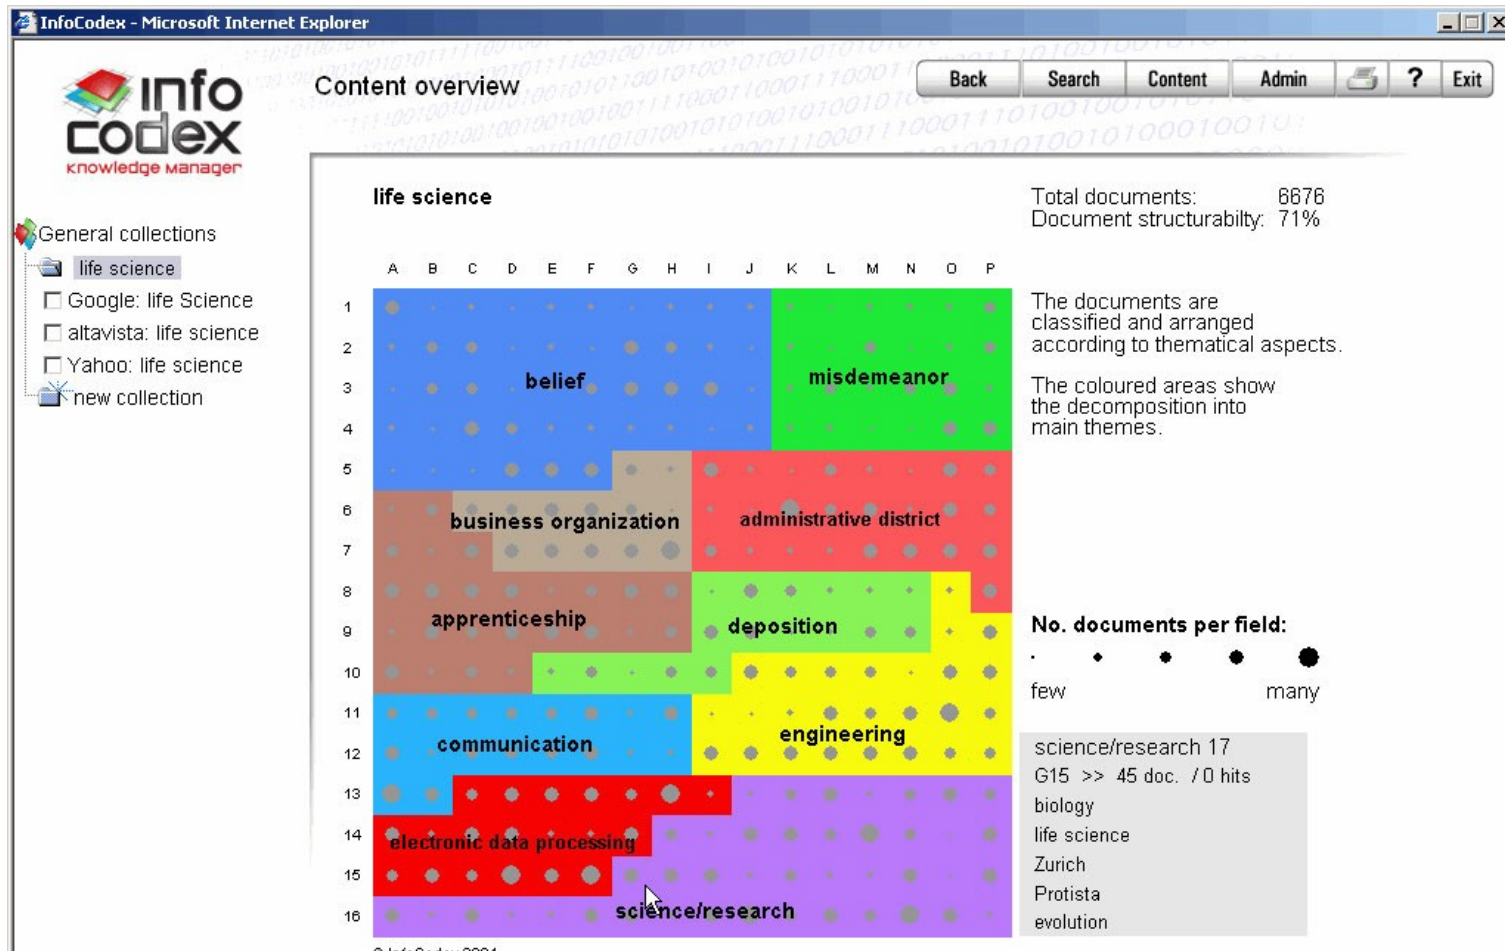

3. Process Automation

- Content analysis → categorization
- E-mail forwarding
- Response management

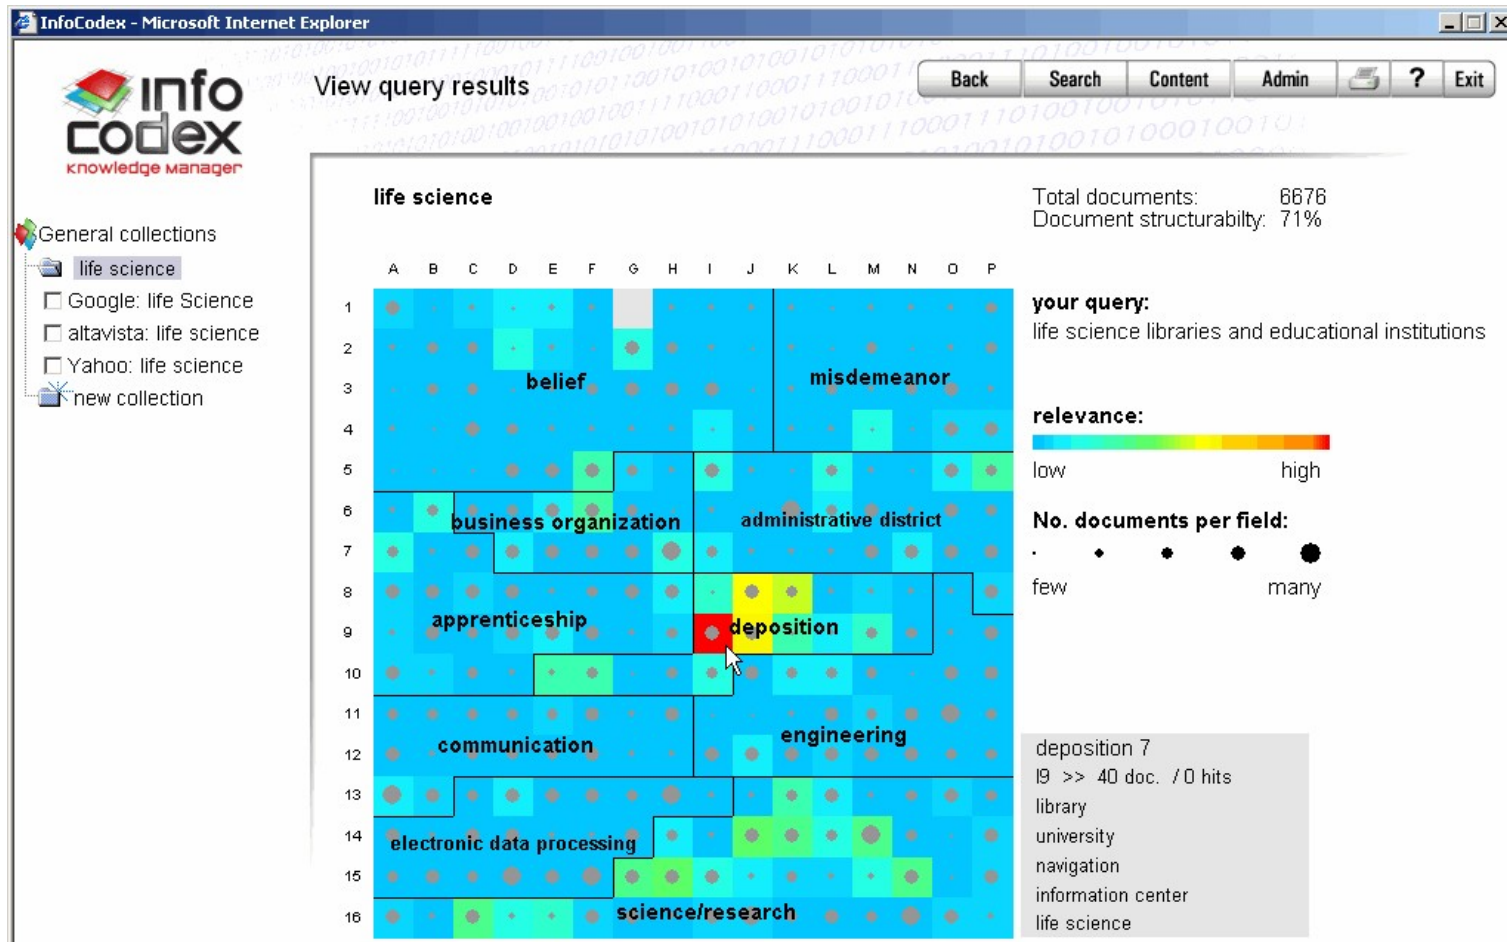

- Categorization of documents without any training
- Graphical overview over the whole collection

■ **Heat-map representation of search results**
(essential aid in the case of large result lists)

Simplicity

Quality

Performance

- **Recognition of content:**

Linguistics + taxonomy + statistics + neural networks

- **Combination of languages:**

English + French + German + Italian

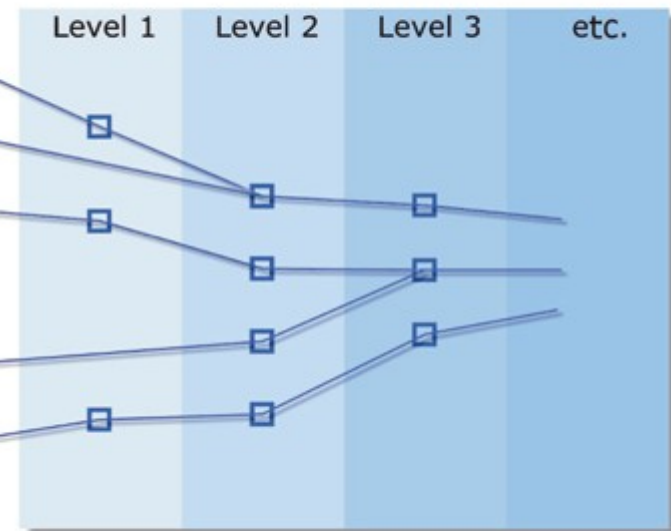

- **Search possibilities:**

Traditional full-text search

Synonym search

Similarity search

Index search

Simplicity

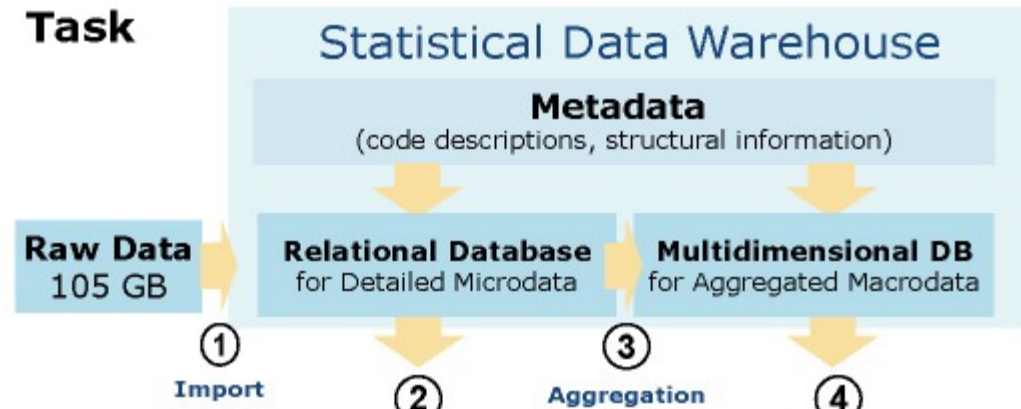

Quality

Performance

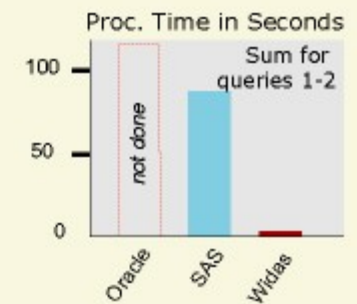

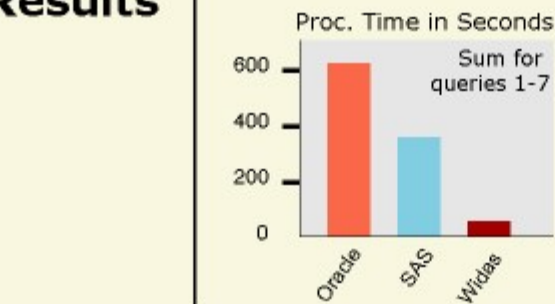

- Based on the benchmark-winning WIDAS system
- Accurate categorization of millions of documents

Task

Results

Unique features of InfoCodex

InfoCodex is the only system having a multilingual knowledge repository (linguistic database linked to a taxonomy tree).

The projection of documents onto a customized content space for the deployment of self-organizing neural networks is patented in Europe and the USA.

Resulting Benefits

immediate use

categorization of documents without any human training

synonym recognition

true cross-language retrieval

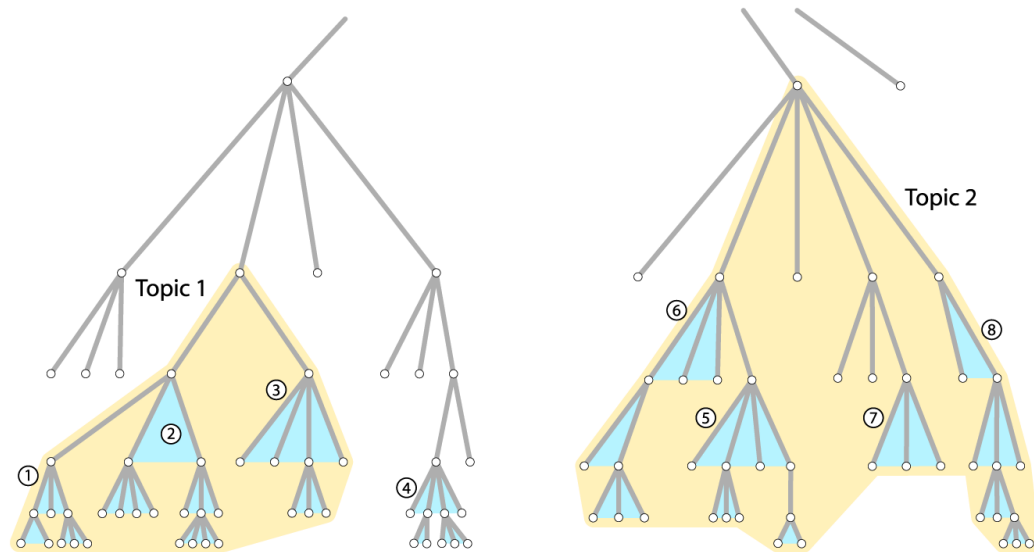

similarity search

find documents similar to an incoming paper (e.g. Email)

topic clustering

essential aid in the case of large search result lists

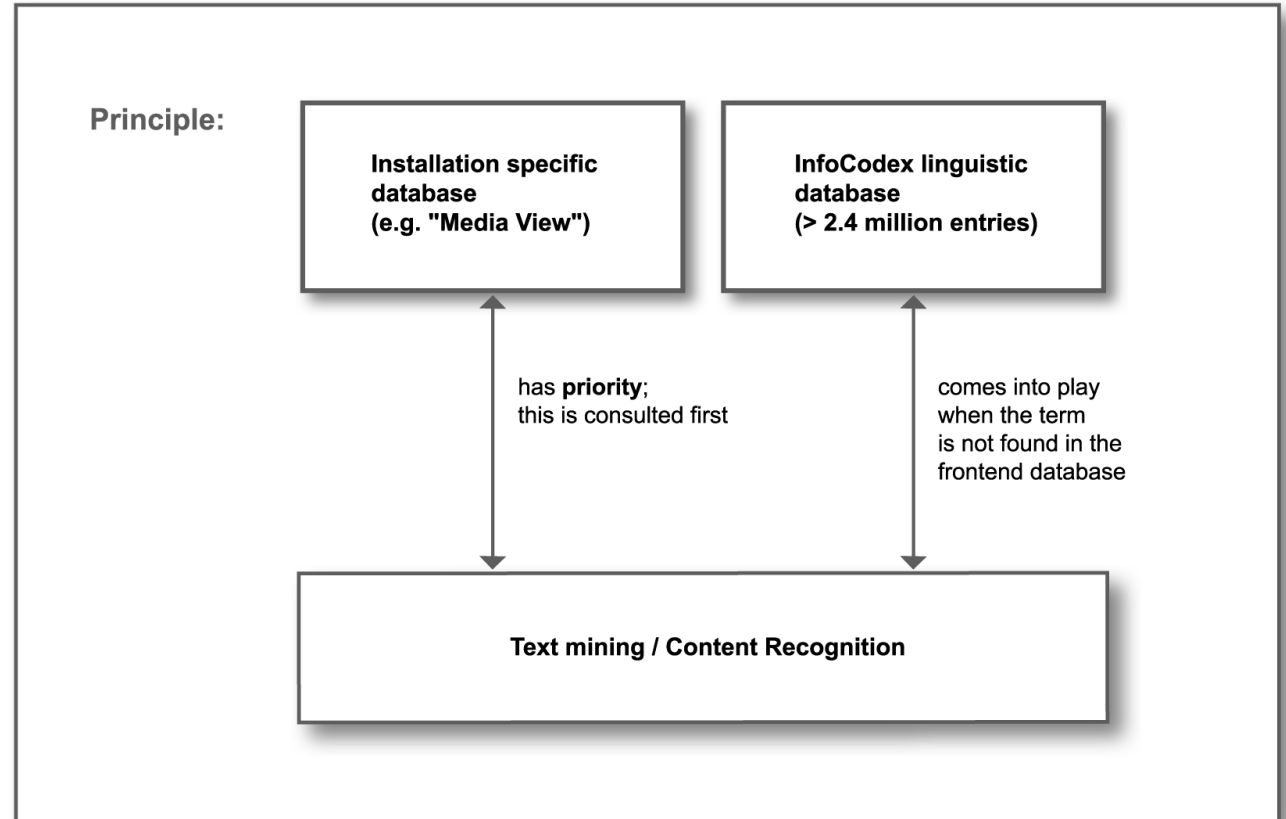

Thematic Grouping of Documents

Combining Agglomeration Clusters into Thematic Topics
